**CLC Selected By FEMA To Manage
Landlord Direct Payment Plan
For Landlords Housing Hurricane Evacuees**

(Wichita, KS) – Corporate Lodging Consultants Inc. (CLC) has received a contract from the Federal Emergency Management Agency to process rental payments to landlords under a plan that is housing hurricanes Katrina and Rita evacuees at rental properties across the United States.

The FEMA Landlord Direct Payment Plan launched March 1, 2006, and will replace payments currently being funded by FEMA and being administered by state and local governments. Under the new program, FEMA will discontinue rental property payments through those government entities and CLC will handle the management duties, including qualifying landlords and processing FEMA payments to landlords.

CLC is a privately-held company that previously contracted with FEMA to administer the FEMA Short-Term Lodging program, which temporarily housed more than 700,000 hurricane Katrina and Rita evacuees in nearly 12,000 nationwide hotels.

"CLC has had the opportunity to work with FEMA housing evacuees since Hurricane Katrina hit the Gulf Coast in August 2005," said George E. Hansen III, president and CEO of CLC. "Throughout these months we have developed an excellent working relationship with FEMA. We have the experience, technology and staff resources to make the Landlord Direct Payment Plan operate as smoothly and efficiently as the Short-Term Lodging Program."
