Find CLC Hotels With Google Mapping

New CLC mapping capability puts locations, details in view instantly

Wichita, Kansas (April 22, 2009) – Corporate Lodging Consultants (CLC) is making it easier than ever for its business clients to find convenient business lodging with a new service powered by Google Maps. The free, Web-based service instantly maps up to 40 hotels matching clients' hotel-search criteria, allowing travelers to quickly identify CLC approved hotels nearest their travel routes and destinations.

CLC provides customized lodging programs for business clients whose employees frequently travel to deliver products and services. "This new hotel search enhancement allows CLC to offer clients more of the features they've told us they want," said Tim Downs, President of Corporate Lodging Consultants.

Clients now can search by street address, as well as by city, state and zip code, to refine their hotel results. When hotels are displayed on the Google map, clients can click on individual hotel sites to get driving directions.

An on-map search function identifies restaurants, gas stations and other amenities near hotels, and clients can text hotel information to a cell phone or e-mail address. In addition to the new on-map capabilities, clients have the option of downloading a spreadsheet that lists all hotels meeting the search criteria.

Corporate Lodging Consultants (CLC) is a division of FleetCor, the Global Fleet Card Company. CLC has more than 30 years experience as the leading provider of lodging management programs to businesses, serving thousands of clients in North America. CLC's clients purchase more than 8 million room nights annually across CLC's proprietary network of more than 12,000 hotels.
